“The authors would like to inform readers that, because of a clerical mistakes, the samples labeled as ‘striatum’ in Figure 4A-B, Supplementary Figures S3A-D, S3E-H, S3I-L, S4B-F, S4H-L, S4N-R, and Supplementary Tables 1 and 4 actually correspond to thalamus, while the samples labeled as ‘cortex’ contained a mixture of cortical and striatal tissue. Accordingly, in these figures and in the corresponding text, the

label ‘striatum’ should be read as ‘thalamus,’ and the label ‘cortex’ as ‘cortex + striatum’. All behavioral, electrophysiological, and immunohistochemical data reported in the paper were obtained from whole-brain or whole-animal studies and therefore remain unaffected. The authors apologize for any inconvenience this may have caused.”
